

greenhouse logistics

WORLDWIDE

**Your specialist in
greenhouse logistics.**

ALLPORT GREENHOUSE SOLUTIONS

We are Allport Greenhouse Solutions.

Allport Greenhouse Solutions is a division of Allport Netherlands that specialises in logistics for greenhouse projects worldwide. Allport Netherlands is based in Rotterdam, has offices in 30 countries and an extensive network of exclusive agents in another 100 countries.

We manage all the logistics and customs formalities in your greenhouse projects from A to Z. Our engaged and experienced staff takes all this work off your hands. In addition to our experience, competitive rates and long-standing relations with well-known container shipping companies, our extensive online logistics information system offers several options to keep all steps in the process transparent and well organised.

This especially custom-made system designed by Allport entails more than tracking & tracing and particularly focuses on the supply chain with regard to your greenhouse construction: from the moment the container is loaded up to the moment the empty container is delivered to the container depot.

The information on your deliveries and shipments is always up-to-date and provides insights into all the steps in the logistics of your project: what is the status of the container(s), what is the planning?

Furthermore, we can upload all relevant documents such as the B/L, and invoice and packing list per container so you can easily see which shipment it refers to.

Whatever route you choose, we are prepared for it !

We manage the logistics and customs formalities from A to Z.

24/7 monitoring

Besides the customer, employees on construction sites can also log on to the system to ensure all stakeholders are informed at all times. You determine who gets access to the information. Because it's an online system, you have the opportunity at all times to log on and in doing so work around the different time zones.

The entire process is monitored on a daily basis and updates are processed immediately by Allport Greenhouse Solutions specialists. Stakeholders automatically receive each update by email. By using proactive warning messages, we make sure your containers are returned within the free detention period.

All information is checked for accuracy by our people so you no longer have to depend on different and inaccurate sources. After the greenhouse has been commissioned, we will also handle shipments from subcontractors if needed.

Allport Greenhouse Solutions:
